U-300 Semi-Auto/Pneumatic Underpinner

Our U-300 is a bench top frame joining machine and the most popular model with the custom frame shops. It is compact, well constructed and built for many years of trouble free operation. The design of the U-300 allows the framer to set the front and back stops for V-Nail insertion. The frame is then moved across the nail head and V-Nails are driven or stacked anywhere along the frame joint. The V-Nail insertion is actuated through the use of a pneumatic pedal.

Clamping Pad System

Positive Placement Vertical Clamping

- Improves clamping by incorporating pre-drilled positioning adjustments
- Spring loaded pull pin locking mechanism eliminates slippage, wear on vertical rod and allows quick adjustments

Easy Field Replacement

Enables a quick change to a different clamping pad depending on joining applications

Clamping Pads

- All clamping pads are interchangeable with magnetic, single and double metal pressure plates
- Three different pads are available based on moulding hardness, contour, finishes or coatings

U-300 Unique Performance Features

- Features pneumatic loader to eliminate nail jams
- "Soft Clamping" pneumatic feature for damage free joints
- Quick-change magnetic pad hold down feature fitting most moulding profiles
- Small table-top foot print needed – 305mm (12") wide x 483mm (19") length x 356mm (14") high
- Operates only with pneumatic air, no electrical hook-up needed
- Dual function foot pedal for separate control of mould clamping and V-Nail insertion
- Designed with a unique trouble free piston V-Nail driver block-blade system for years of dependable single and multi-stacking operations
- CE Compliant
